Between 10 and 15 March 1948, 360 engineers of the Soviet Army arrived in Slovenia in groups of 60 to 80 from Belgrade.

Headquarters for the group has been established in the Castle of Vojnik, near Celje. The engineers, who are to carry out or supervise a number of surveying and constructional tasks, have no contact with local civilians and travel for the most part in half-tracked vehicles.

3. The engineers are, among other things, to supervise the construction of a strategic road on Mt. Peca, north of Sostanj for which work is scheduled to begin in early summer.
